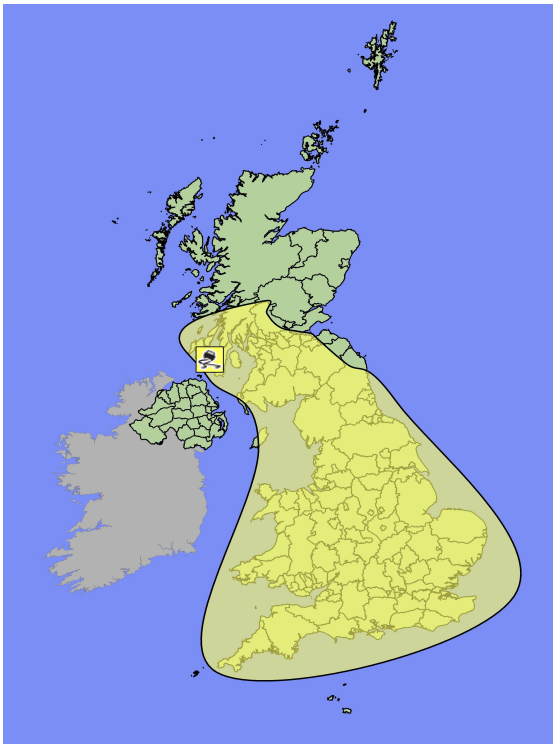
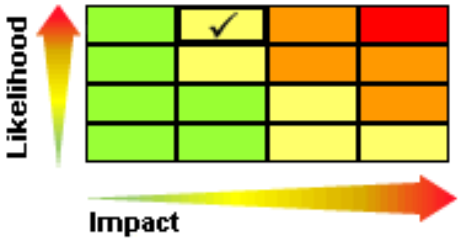
National Severe Weather Warning Service





Chief Forecasters Assessment
Another night with icy surfaces as temperatures fall below freezing. A frontal system affecting southern Britain on Tuesday will increase the ice risk as will the refreezing of lying snow in other areas.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **16:00 on Tue, 22nd Jan 2013** until **11:00 on Wed, 23rd Jan 2013**

As temperatures fall on Tuesday evening and night, icy stretches will form on many untreated surfaces especially where lying snow freezes. There may also be a few light snow flurries in places though any new accumulations will be slight. Freezing fog patches may also add to travel difficulties. The public are advised to take extra care.
